Needs Work

Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include homepage access and crawler policy, while plain-text page access and content signals need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Recommended next step

- 1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
- 2. Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.
- 3. Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Signal breakdown

Crawlability Pass 20/20

The homepage resolves, connects, returns HTTP 200 OK, exposes a canonical URL, and is not blocked by robots.txt.

Robots.txt Pass 15/15

robots.txt allows crawler access and includes Sitemap references.

llms.txt Warn 7.5/15

Publish /llms.txt as text or markdown with more than 200 characters, markdown headings, and at least one absolute URL.

Sitemap

Pass10/10

The sitemap.xml file is valid and contains URL entries.

Markdown support

Fail0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

Semantic HTML

Warn5.7/10

Shorten the meta description to 160 characters or fewer. Avoid skipped heading levels so sections progress from h1 to h2 to h3 without gaps. Add missing semantic elements: article.

Structured data

Pass10/10

Valid JSON-LD structured data was found with core Organization or WebSite schema.org types.

Content signals

Fail0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

Suggested fixes

Fix Content signals

HTML

<meta http-equiv="Content-Signal" content="ai-train=no, search=yes, ai-input=yes" />
<meta name="content-signal" content="ai-train=no, search=yes, ai-input=yes" />
