Needs Work

## Executive summary

This site has a useful foundation, but important gaps still limit AI readability. Key strengths include crawler policy and AI guidance file, while plain-text page access and sitemap need attention. Recommended next step: add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Recommended next step

1. Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.
2. Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.
3. Regenerate sitemap.xml with valid XML and a sitemap <urlset> or <sitemapindex> root element.

## Signal breakdown

### Crawlability

Warn 10/20

Serve a non-empty HTML homepage with a canonical link tag that points to the preferred public URL.

### Robots.txt

Pass 15/15

Add Sitemap directives to robots.txt so crawlers can find canonical sitemap files.

### llms.txt

Pass 15/15

The llms.txt file was found and includes the expected text, length, heading, and URL signals.

## Sitemap

Fail 0/10

Regenerate sitemap.xml with valid XML and a sitemap <urlset> or <sitemapindex> root element.

## Markdown support

Fail 0/15

Add content negotiation for Accept: text/markdown on the homepage and return a markdown representation with Content-Type: text/markdown. Keep the HTML response for regular browser requests.

## Semantic HTML

Warn 5.7/10

Add exactly one h1 element that describes the page topic. Add missing semantic elements: main, article, nav, footer. Add visible body copy after script and style removal so the page has at least 200 words.

## Structured data

Fail 0/10

Add JSON-LD structured data with Organization or WebSite schema so AI systems can identify the site owner or website entity.

## Content signals

Fail 0/5

Add the standard directive 'Content-Signal: ai-train=no, search=yes, ai-input=yes' to robots.txt, HTML metadata, or HTTP headers so AI systems can discover content usage preferences.

## Suggested fixes

### Fix Structured data

#### HTML

```
<script type="application/ld+json">
{
  "@context": "https://schema.org",
  "@graph": [
    {
      "@type": "Organization",
      "@id": "https://certifyr.vercel.app/#organization",
      "name": "Certifyr - Generate Legal Docs in Seconds with AI",
      "description": "Generate legally reliable institutional documents quickly and easily",
      "url": "https://certifyr.vercel.app/",
      "logo":
        "https://certifyr.vercel.app/uploads/30a6a699-ff30-486d-8225-816f6de9650e.png"
    },
    {
      "@type": "WebSite",
      "@id": "https://certifyr.vercel.app/#website",
      "name": "Certifyr - Generate Legal Docs in Seconds with AI",
      "description": "Generate legally reliable institutional documents quickly and easily",
      "url": "https://certifyr.vercel.app/",
      "publisher": {
        "@id": "https://certifyr.vercel.app/#organization"
      }
    }
  ],
  "inLanguage": "en"
}
